## INTERNATIONAL TECHNOLOGY RESEARCH INSTITUTE Technology Transfer (TTEC) Division

The Technology Transfer (TTEC) Division at Loyola College's International Technology Research Institute (ITRI) provides assessments of foreign research and development in selected technologies. Dr. R.D. Shelton is Director of ITRI. Support is provided by a variety of U.S. government agencies, including ONR, DoC, and NSF.

ITRI's mission is two-pronged: (1) to inform U.S. policymakers, strategic planners, and managers of the state of selected technologies in foreign countries in comparison to the United States; and (2) to identify opportunities for international cooperation among countries and collaboration among researchers. ITRI assessments cover basic research, advanced development, and applications. Panels of typically six technical experts conduct these assessments. Panelists are leading authorities in their fields, technically active, and knowledgeable about U.S. and foreign research programs. As part of the assessment process, panels visit and carry out extensive discussions with foreign scientists and engineers in their labs.

The ITRI staff at Loyola College helps select topics, recruits expert panelists, arranges study visits to foreign laboratories, organizes workshop presentations, and finally, edits and disseminates the final reports.
